Creating and Logging Into Your Account

Inas Laghzaoui - 2025-08-20 - [Comments \(0\)](#) - [Reebok Connect](#)

Get started by securing your profile in the app.

Before pairing your Reebok Pulse or accessing your health data, you'll need to either create a new account or sign in using a supported login method.

Create a New Account

1. Open the app and tap **Create Account** or **Sign up**.
2. Enter the required information (name, email address, password).
3. A **verification code** will be sent to the email address you provided.
4. Enter the verification code in the app to complete your registration.

Once verified, your account is active and ready to use.

Log In with Socials

You can also log in using an existing account from one of the supported platforms:

- **Google**
- **Other social login options (Facebook, X, etc.)**

Simply tap the appropriate icon and follow the onscreen prompts to grant access.

This option allows fast login without creating a separate password.

Having Trouble?

If you do not receive the verification code or are unable to log in using your account, please contact our Support team for assistance. The team can help verify your email and guide you through any issues.
