Vision Accessibility

Inas Laghzaoui - 2025-08-27 - [Comments \(0\)](#) - [Accessibility](#)

Visual Accessibility on Reebok Wearables

Reebok is committed to making wearables as usable as possible for everyone. While our watches do not currently have specialized accessibility features like large-font modes or high-contrast displays, we offer several options that can help:

- **Customizable watch faces:** Choose from a variety of designs to find one that's easier to read.
- **Adjustable brightness:** Increase or decrease screen brightness to suit different lighting conditions.

If you have specific visual accessibility needs, our support team is happy to help you find solutions or provide guidance. **Reach out to us** via the support page or in-app chat. We want to make your Reebok Icon work for you.
